Oksana Shuptar

Front-End Developer

✉ shuptaroks@gmail.com   📞 +380633025001   📍 Lviv   🔗 https://github.com/mesmeri

Short information

A Front-end developer, interested in creating exciting, impressive products such as state-of-the-art websites and SPA mostly on React.js. But I am also ready for continuous improvement of knowledge and learning of new technologies.

Professional skills

HTML5 & CSS3(SCSS)	JavaScript(ES6)	React.js(Redux)
Gulp, Webpack	Git, Bitbucket	Animation API, GSAP, Canvas
Firebase(Auth, Database)		

Work experience

I have 4 years of work experience not in this specialization.

Education

Lviv National University of Ivan Franko

2009 - 2012

Jurisprudence

Certificates

2020   The Rolling Scopes School, "React"

2019   The Rolling Scopes School, "JavaScript"

About me

I can be useful in **converting web design to code**, with impressive animations and effects, **creating various web applications on React or pure JavaScript**.

However, I am ready to learn new technologies, and gladly participate in all educational programs of the company or other opportunities to improve my knowledge and skills.

In my spare time, I read a lot, but still about programming, because it is the very first topic I`m interested in now.

I am a *diligent, sociable* person, hope for a friendly and comfortable working atmosphere.
